Coral Springs, FL 33065

## Description:

Bin vibrators help to minimize clogging and sticking of stubborn materials in hoppers, chutes, and feed bins. Choose from 8 models for applications ranging from the tiniest hopper to a bin with a 6-ton capacity. Three types are available; the N-series is noiseless and produces a flexing of the bin wall; the P-series operates by internally impacting steel on steel; the S-series is also an impact model, but utilizes a rubber-covered anvil for quieter operation. The standard models are for 115v/ 1ph/50-60hz, but 230v and 460v are also available. Supplied with or without controller.

Catalog Number	Model	Hopper Volume
020C-021	20N	5 cu ft
020C-031	30N	15 cu ft
020C-041	30P	20 cu ft
