Wilmington, CA 90744

### EAST COAST

3740 NW 124th Ave  
Coral Springs, FL 33065

### Description:

The Sepor Mini-Pulverizer comes with ceramic or tungsten carbide grinding plates and is ideally suited for reducing small quantities of minus 1/8 inch material to minus 150 mesh. It has a nominal capacity for reducing 1 to 20 gram size batch samples (Quartz Ore). Plate life for ceramic plates is typically 1,000 to 3,000 individual samples of 10 grams of quartz ore reduced to 150mesh. By reversing the direction of the plate rotation, the plate life may be maximized. A switch is provided on the crusher for reversing the plate direction. Grinding size is adjustable from 40 mesh to 150 mesh. The pulverizer is easily cleaned with a brush, air hose or vacuum.

### Construction:

Motor: 1/3 HP capacitor start

Bearings: Sealed

Closure: Cam action

Grind Adjust: Variable

Shipping Weight: 40 lbs.
