Description:

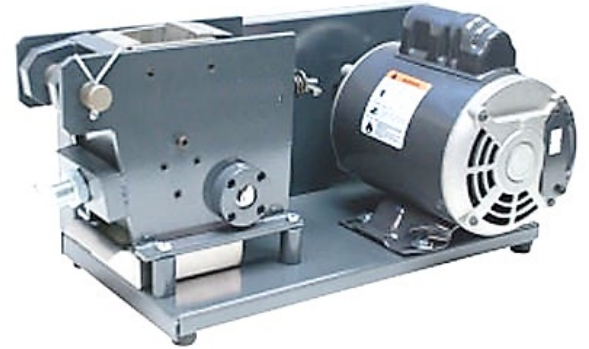

The SEPOR Mini-Jaw Crusher is suitable for crushing small quantities of rock and other friable material, ranging in hardness from hard quartz to relatively soft claystone. It is available with a variety of wear surfaces:

- Hardened steel alloy plates
- Tungsten Carbide plates
- 85% Alumina (ceramic) plates
- 85% Zirconia (ceramic) plates **NEW!**

All jaw plate types are interchangeable.

The feed opening is 2" x 2" with a maximum feed size of ~1" material. About 1/3 lb. per minute (20 pounds per hour) can be crushed to -1/8" depending on the nature of the feed material. The size of the crushed product is adjustable by turning the hand-wheel, which adjusts the gap at the bottom of the jaws. The jaw opening range is 1/4" to 1/16".

A stainless-steel tray collects the crushed sample.

FEATURES

Motor: 1/4Hp 110/1Ph/60Hz or 220/1Ph/50Hz

Bearings: Heavy-duty needle bearings, sealed

Eccentric shaft: Case hardened alloy steel

Frame: Heavy welded steel frame provides rigid support necessary for crushing a wide variety of materials and for excellent wear characteristics

Mini Jaw Crushers are normally in stock for immediate shipment.
